STATE CENTER COMMUNITY COLLEGE DISTRICT

Posted: 6/11/2020

State Center Community College District (SCCCD) is a California Community Colleges System district in Central California, including Fresno City College in Fresno (1st CA community college), Reedley College in Reedley, and Clovis Community College in Clovis. Reedley College also maintains satellite campuses called North Centers in Madera and Oakhurst. Clovis Community College was formerly a North Center of Reedley College, known as the Willow International Center.

BUSINESS NEEDS

SCCCD was using primitive education content management name Blackboard with limited features at premium cost. The college's existing processes were not integrated and did not provide the required functionality to operate in an increasingly complex environment. The client wanted to develop a modern solution which can provide response strategy, reduce data errors, improve traceability, develop solution to track & manage content, permissions management, automation, single sign on and data protection.

SOLUTION

Golden Five SharePoint Developers designed and developed 5 modern SharePoint advance sites with integrated systems to track and manage content easily. The team also developed 5 different anonymous Azure sites with single source content mapping. Golden Five developed new logic to map this requirement through Azure integration with Office 365 SharePoint Online with SSO.
-Created 5 Office 365 SharePoint online sites.
-Migrated content from Blackboard to SharePoint Online site.
-Created 5 Azure web sites for each college.
-Linked Azure sites with content stored in SharePoint sites.
-Created SharePoint Online Automation App for new subsites.

BENEFITS

1. Security improved with Data Loss Prevention
2. Ease of use with automation Templates
3. Ease of Identity Management with AADConnect and Shibboleth SSO
4. Better operation committees and groups management
5. Operational efficiency and employee productivity increased
6. Accessible websites, custom download request form, and FERPA, HIPAA, GLBA and NIST compliant

RESULT: SECURE, PROTECTED, AUTOMATED, & ADVANCED CONTENT MANAGEMENT SOLUTION
