BUSINESS NEEDS

One of their customers who is using SharePoint Server 2016 Farm for ecommerce business with multiple servers and multiple SharePoint sites. During the Corona Virus Epidemic, customer's security team pushed new security policy. Security policy needed SharePoint Site users idle time out to be set to 30 minutes.

SOLUTION

We developed a custom solution which was added in every Sites Master Page.
Customer now wanted to go back to the old page after re-login.
We developed second custom solution which was applied on Signout page on every server.
This project has shown our SharePoint custom development capabilities.

BENEFITS

1. Customer security improved
2. Customer's customers security improved
3. Website idle time out started signing out
4. Customer was able to re-login and reached back to the same page
5. Customer has no worry if end user will leave the website logged in

RESULT: IDLE TIME OUT HAS IMPROVED SECURITY FOR ECOMMERCE SHAREPOINT SITE
